61 HD SERIES
PRODUCT FEATURES
3" Vertical Discharge Units

APPLICATIONS
- Engineered Lift Stations
- Storm Water Removal
- Wastewater Transfer
- Industrial Wastewater

MATERIAL FEATURES

PUMP:
- Solids - 2½" spherical capability
- Discharge Size - 3" NPT Vertical
- Seals - dual mechanical carbon/rotary ceramic/stationary, Buna-N elastomers
- Construction - Cast Iron ASTM A-48, Class 30, 30,000# tensile strength, protected with a corrosion resistant baked on epoxy powder coating
- Balanced concentric pump housing and impeller
- Attaching Hardware - 304 stainless steel
- O-ring Seals: Buna-N
- Ductile Iron Impeller - 2 blade semi-open with top pump out vanes
- Optional:
  - Thermal sensor and moisture detection system
  - Trimmed Impeller
  - Vortex Impeller
  - Bronze Impeller (1-3 BHP, not CSA listed)
  - Silicon carbide seal(s)
  - Viton O-ring Elastomers (1-5 BHP, not CSA listed)
  - Additional cord length __ ft.

MOTOR:
- 1 Phase - 230 Volt, 1750 RPM
- 3 Phase - 200/230/460/575 Volt, 1750 RPM
- Stator - Class F insulation and lead wires
  NEMA B design.
- Oil-filled motor housing
- Finned cast iron housing for faster heat dissipation
- Ball Bearings - Dual high carbon chromium steel
- Power Cable Length - 25'

ENGINEERING FEATURES:
1. 25' of heavy duty power cable
2. Protected cable entrance. The compression grommet allows for field replacement of the cable.
3. Each conductor is individually sealed to eliminate cord wicking of liquids
4. Lifting lug integral part of housing
5. Oil-filled motor housing assures uniform heat distribution, lubricates bearings, and conducts heat for cooler running
6. Heavy duty motor features ball bearing construction. Class F motor insulation is double dipped and baked. End connections and lead wires are Class F. At maximum load, winding temperature will not exceed 250°F with motor housing not submerged.
7. Tandem seals. Carbon/rotating, ceramic/stationary, Buna-N elastomers
8. Upper and lower high carbon chromium steel ball bearings
9. Stainless steel shaft and hardware resists corrosion
10. Optional: Patented moisture detection system with upper and lower probes, protecting the motor from liquid entry.
11. Optional: Thermal sensor protection. Motors have 2 normally closed temperature sensors imbedded in windings.
12. Optional: 25' sensor cable
13. Balanced Ductile Iron 2 vanes semi-open impeller with top pump out vanes for seal protection. Keyed and bolted to shaft
14. Concentric case reduces radial loading for longer bearing and seal life
15. 3" NPT vertical discharge
16. Vent hole helps prevent air locking
17. Units protected with corrosion resistant baked on epoxy powder coating

61 HD SERIES
PRODUCT FEATURES
3” & 4” Flanged Horizontal Discharge Units

APPLICATIONS
- Engineered Lift Stations
- Storm Water Removal
- Wastewater Transfer
- Industrial Wastewater

SPECIFICATIONS
PUMP:
- Solids - 2 1/4” spherical capability
- Discharge Size - 3” & 4” Flanged horizontal
- Seals - dual mechanical carbon/rotary ceramic/stationary, Buna-N elastomers
- Construction - Cast Iron ASTM A-48, Class 30, 30,000# tensile strength, protected with a corrosion resistant baked on epoxy powder coating
- Balanced concentric pump housing and impeller
- Attaching Hardware - 304 stainless steel
- O-ring Seals: Buna-N
- Ductile Iron Impeller - 2 blade semi-open with top pump out vanes
- Optional:
  - Thermal sensor and moisture detection system
  - Trimmed Impeller
  - Vortex Impeller
  - Bronze Impeller
  - 3” solids capacity
  - (4” discharge units only)
  - High Temperature Construction
  - Silicon carbide seal/s
  - (1-3 BHP, not CSA listed)
  - Inverter Duty Motor
  - Additional cord length ____ ft.
  - Rail Systems

MOTOR:
- 1 Phase - 230 Volt, 1750 RPM
- 3 Phase - 200/230/460/575 Volt, 1750 RPM
- Stator - Class F insulation and lead wires
- NEMA B design
- Housing - Cast Iron, oil-filled
- Ball Bearings - Dual high carbon chromium steel
- Power Cable Length - 25’

FEATURES:
1. 25’ of heavy duty power cable
2. Protected cable entrance. The compression grommet allows for field replacement of the cable.
3. Each conductor is individually sealed to eliminate cord wicking of liquids.
4. Lifting lug integral part of housing
5. Oil-filled motor housing assures uniform heat distribution, lubricates bearings, and conducts heat for cooler running.
6. Heavy duty motor features ball bearing construction. Class F motor insulation is double dipped and baked. End connections and lead wires are Class F. At maximum load, winding temperature will not exceed 250°F with motor housing not submerged.
7. Tandem seals, Carbon/rotating, ceramic/stationary, Buna-N elastomers
8. Upper and lower high carbon chromium steel ball bearings
9. Stainless steel shaft and hardware resists corrosion
10. Optional: Patented moisture detection system with upper and lower probes, protecting the motor from liquid entry.
11. Optional: Thermal sensor protection. Motors have 2 normally closed temperature sensors imbedded in windings.
12. Optional: 25’ sensor cable
13. Balanced Ductile Iron 2 vanes semi-open impeller with top pump out vanes for seal protection. Keyed and bolted to shaft
14. Concentric case reduces radial loading for longer bearing and seal life.
15. 3” or 4” flanged horizontal discharge
16. Vent hole helps prevent air locking
17. Unit protected with corrosion resistant baked on epoxy powder coating.
